News and Announcements

Fringe Screw™ - New Sizes and Finishes Available NOW

New Finishes: Oil-Rubbed Bronze & Satin Brass
New Sizes: Entry Doors with size #10 Head
New Lengths: ● 3 inch for interior doors
● 4 inch for entry doors

Fringe Screw™ has a new application: Entry Door Security

Entry Doors are heavy and represent your line of defense against a potential break-in. Typically they are installed with only one long screw per hinge to secure the door jamb to the house structure. We recommend **replacing all of your jamb side hinge screws with 4-inch Fringe Screws™** to better secure your entry door from unwanted entry.

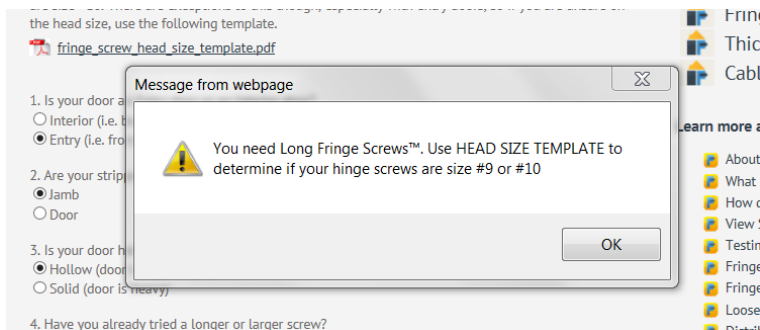

Make your home more secure NOW!

Website Redesign

We have made many updates to our website

- Interactive page dedicated to helping you choose which Fringe Screw™ size is right for you
- Increased illustrations
- Expanded distributors page
